

TUNABLE COLORFUL CLONE

Thank you for purchasing a Wilson Effect's Tunable Colorful Clone. The pedal is modeled after an original Colorsound Wah. There are some additional features that enable you to dial in a lot of other wah tones via the exterior controls on the pedal. So whether you enjoy the dark growl of the stock setting (all knobs at noon) or you would like to dial in any other classic or modern wah tones the controls are at your finger tips.

Layout and overview of the Tunable Colorful Clone

- A) Growl/Bass and Gain:** Controls the amount of bass and gain in the circuit. Otherwise known as growl. Turning this knob towards the heel of the pedal will introduce more lows and growl into the effect. Turning it towards the front of the pedal will thin the sound out.
- B) Guitar Input**
- C) Q Selector Switch:** There are 5 additional Q settings on the pedal. One towards the front of the pedal and four towards the heel. Turning it towards the heel of the pedal will brighten the Q effect and turning it towards the front will darken it.
- D) Mid-Range:** This allows you to dial in the mid-range frequency of the pedal.
- E) Depth:** This controls the amount of depth or range the sweep has. Turning the knob towards the front of the pedal will increase the depth and turning it towards the heel will reduce it.
- F) LED On/Off Indicator**
- G) Output to Amplifier**
- H) DC Power Jack:** Use only a 9 volt center negative regulated power supply.

Either a 9v high quality alkaline battery or a 2.1mm center negative power supply and cable can power your new Tunable Colorful Clone. When operating the pedal via battery you should unplug the pedal when not in use to insure the longest battery life. Try to keep your pedal as far away from your power supply as possible to minimize interference. Use high quality electronics grade cleaners and lubricants for the occasional cleaning of wah pedal components. If you have any other questions or concerns please visit the FAQ page at www.wilsoneffects.com or email me at wilsoneffects@wilsoneffects.com. Your new pedal is covered by a one-year warranty on parts and labor. This warranty excludes friction-based components such as potentiometers and switches.
